RDBMS

CSS3

HTML5

MySQL

Node.js

ReactJs

Firebase

ContextAPI

Nextjs

Framer Motion

Bootstrap5

Tailwind CSS

MongoDB

Responsive Web Design

Express.js

Redux

PERSONAL PROJECTS

Personal Portfolio

- I created a professional and eye-catching portfolio using React.js. For styling I used SCSS. It is a SPA and has a contact form that is working using EmailJS API which is connected to my personal email and whenever someone presses Send button I receive an Email.

E-commerce Website

- Made using html/css, JavaScript and php on the back end. It has multiple pages and provides specialized access to admin as he can add or remove products from the site. The site is fully responsive.

Real Estate Marketplace

- Based on MERN stack and styled using Tailwind CSS. Used Firebase as well to implement google authentication. Anyone can login and all the house they want to sell or rent. The app is secure and fully optimized

Restaurant Website

- Developed for a restaurant in UAE. I created a responsive web app using Reactjs and Tailwind CSS. For order now and booking purposes I used Multiple forms which were connected to EmailJS API.

CERTIFICATES

Python (Simplilearn)

Python Basics (Data Camp)

Responsive Web Design Using Advance CSS Flex Box
(LinkedIn Learning)

SQL Basics (Great Learning)

SQL Intermediate (Great Learning)

Machine learning (Simplilearn)

Bootstrap 5 (LinkedIn Learning)
